APPLICATION

Incorporating spouts and spill boxes into a bulk materials handling facility is an economical way of filling silos or feeding conveyors from the outlet of a bucket elevator by gravity.

A number of arrangements are available to adapt to your existing facility, or provide a variety of options in the design of your new facility.

FEATURES

- Utilising gravity to convey materials.
- No moving parts.
- Often reduces the number of conveyors required in a system.
- Lining options for high wear areas.
